

## Medicare Counselor

*Overview: Advise seniors and disabled people with Medicare options and related healthcare payment programs.*

I advise present and prospective Medicare clients on their Medicare options, provide price and other information to compare individual plans, help them enroll in plans, help them apply for state and federal subsidies, research coverage issues and assist in appeals to Medicare and insurance companies. We have a hotline, and I advise by phone, in person at various sites and in clients' home. This program is federally funded, and the state of Pennsylvania allocates monies to each county based upon reports each county submits.
